

OFFICE STORAGE SOLUTIONS

Over the past 25 years, we have been providing organisations with optimum storage solutions and are consistently regarded as the UK's leading StorageWall manufacturer.

Our high quality product range sets the standard. Experience has taught us not only how to design, manufacture and install bespoke storage solutions for our clients, but also how to make it part of their environment.

We take immense pride and ownership in that all of our products are engineered, designed and manufactured in the UK and fitted by James Tobias' own staff.

From survey to installation, our considerable experience and knowledge enables us to offer our clients a complete service. With experienced dedicated staff, modern CNC machinery and a passion for design, we can tailor our full range of expertise to provide a bespoke solution when standard is not an option.

SPECIFICATIONS

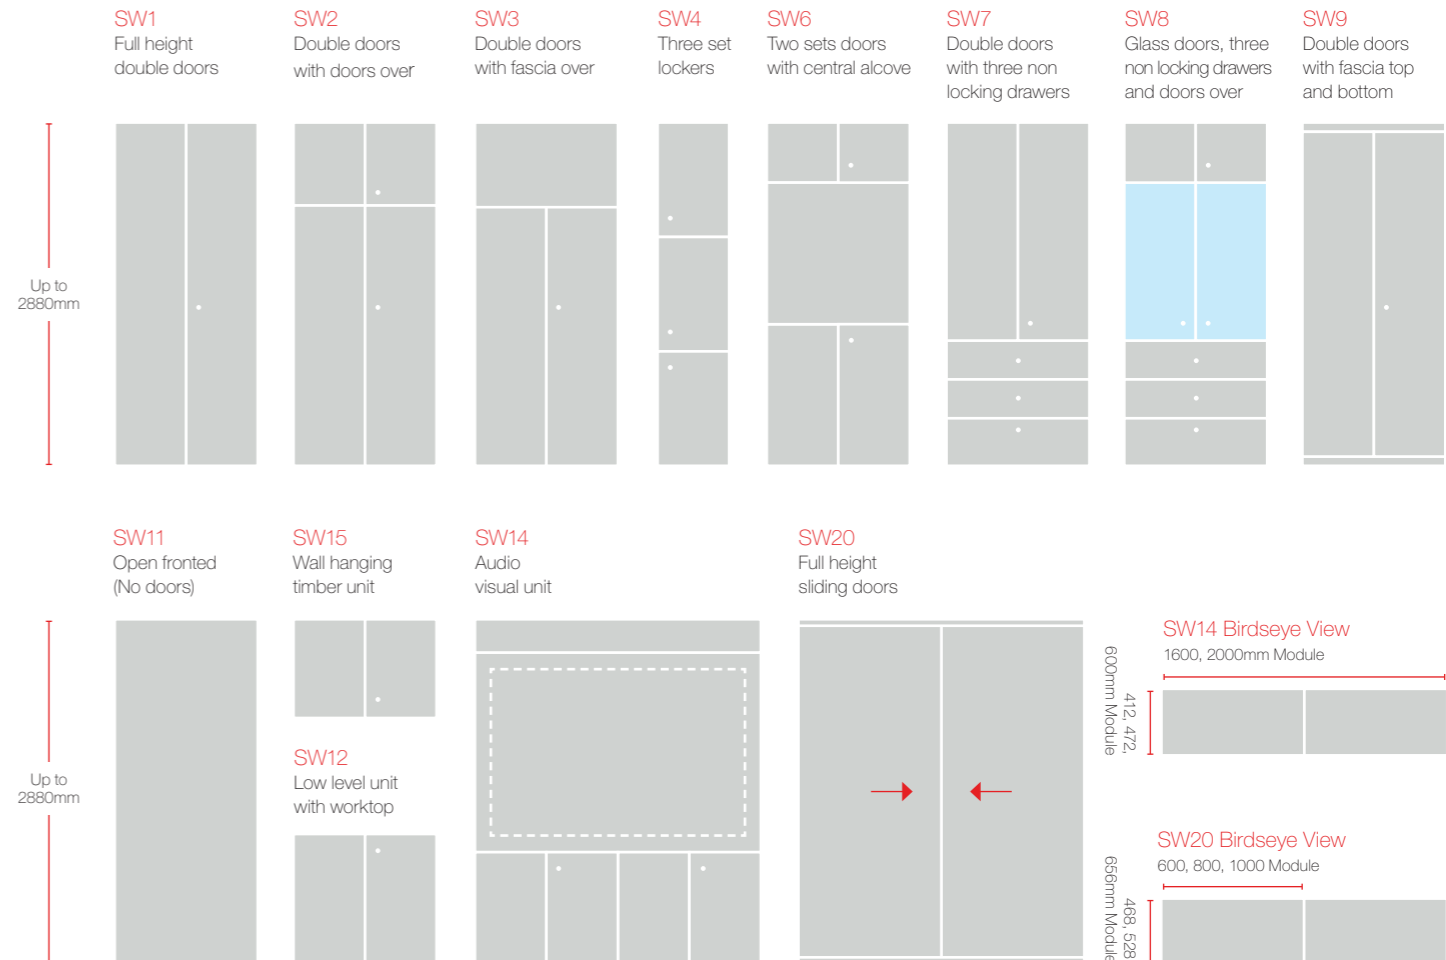

FUNCTIONAL, BESPOKE SPACES

We manufacture a wide range of internal fittings from steel to provide additional strength. Toolless installation of the internals makes it very quick and easy to adjust and reconfigure solutions.

All internals are designed and manufactured in-house in our Somerset factory.

SPECIFICATIONS

StorageWall is manufactured to suit the specific site conditions, to maximise the space available and to minimise site installation time. The system is fully demountable and relocatable with no redundancy of parts. With its height adjustability, it is easy to relocate, even to different buildings.

1 Description (from ground up)

- Three roll out filing frames.
- One combination shelf with pigeon holes above.
- Three adjustable plain steel shelves.

2 Description (from ground up)

- Three drawer fronted deep drawers
- Clad alcove with glass shelves and downlights.

3 Description (from ground up)

- Eight combination shelves for lateral filing pockets.
- One roll out reference shelf.

4 Description (from ground up)

- Six adjustable plain steel shelves

5 Description (from ground up)

- Two adjustable plain shelves.
- One combination shelf.
- Two front to back coat rails.

6 7 Description (from ground up)

- Chiller (example only) and low level double doors with clad alcove for media screen above.

8 Description (from ground up)

- Double door module with top box.

9 Description (from ground up)

- Personal lockers, individually locking compartments for personal storage.

10 Description (from ground up)

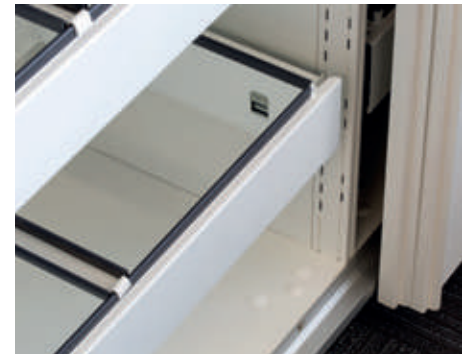

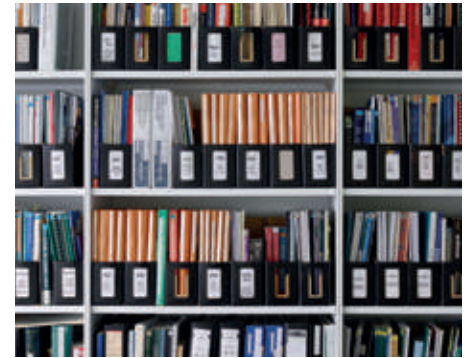

- 600 deep cloaks unit.
- Three adjustable plain steel shelves.
- One lateral coat rail.

11 Description (from ground up)

- One roll out filing frame (shown with dividers).
- Two shallow drawers.
- One combination shelf with mini pigeon above.
- One lateral cradle.
- One slotted shelf with dividers.

12 Description (from ground up)

- Three deep drawers.
- One roll out reference shelf.
- One slotted combination shelf.
- One slotted shelf.
- Two adjustable plain steel shelves.

STORAGEWALL

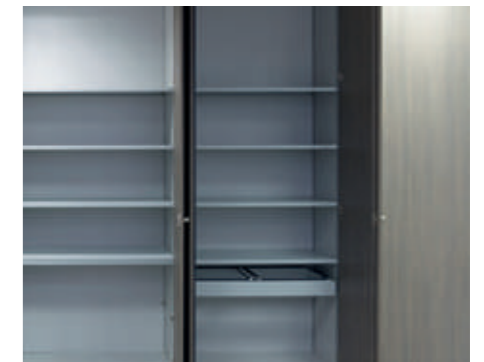

STORAGEWALL

STORAGEWALL

Our StorageWall maximises your storage capabilities and minimises the loss of premium floor space, whilst creating a flexible modern working environment. StorageWall will generate between 23% and 56% more storage capacity than equivalent free-standing units. Surveyed, designed and manufactured to suit your specific requirements, ensuring a tailored fit.

- Various styles and configurations enables StorageWall to be versatile to requirements and preferences.
- Design led – all storage wall units are available in a diverse range of finishes with the option for graphics, allowing for current trends.
- High quality components ensures longevity and a durability.
- Superior strength to weight ratio, using our flagship aluminium structured carcass.
- Toolless operation to reconfigure internal fitments, giving added flexibility.
- StorageWall is fully demountable and re-locatable without any loss of quality.
- Designed and manufactured in-house and fitted by our own experienced fitting teams to ensure we deliver high levels of efficiency and reliability to our customers.
- This StorageWall unit can be used against a wall, or to divide office space as a free standing/room dividing module.

MEDIAWALL

MEDIAWALL

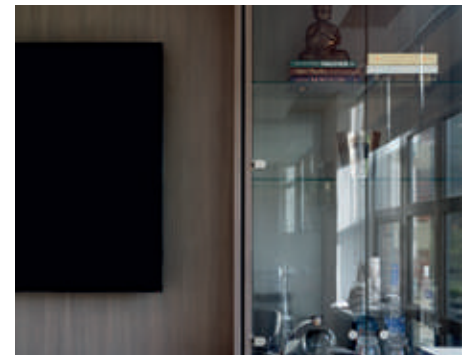

MEDIAWALL

Our MediaWall is designed to showcase your fully functional media centre, suited to any associated environment. Able to house a multitude of hi-tech media equipment, MediaWall combines James Tobias' ethos of maximising capacity and minimising floor space requirements.

MediaWall can be used in many places – from the office to the boardroom, conference and training, breakout rooms – the possibilities are almost endless.

LOCKERS

LOCKERS

LOCKERS

Our lockers help make storage personal.

Your lockers will be the envy of all with optional custom graphics or photographs applied to doors, seamlessly blending the new locker storage solution into your office or environment. Lockers can be supplied as an integrated aluminium or free-standing timber system.

EDUCATIONWALL

EDUCATIONWALL

EDUCATIONWALL

EducationWall is a run of modular storage units to house all the key elements for the modern classroom. Items such as SMART Interactive Whiteboards, Gratrnell trays, charging points for tablets/laptops and lockers to name a few. All of the key items can be incorporated to make one complete attractive, user friendly, multi-purpose storage system.

- Maximises valuable classroom space.
- Improves performance, giving pupils added enthusiasm in the classroom.
- Saves money by taking all current individual products and merging them into one run.
- Acts as an inspirational focal point in a prime location providing space for display work and key learning points.
- Provides a wow factor – a unique tidy solution that fits in with current trends and demands of a busy classroom.

DIVIDE & PARTITIONING

DIVIDE & PARTITIONING

DMIDE

With flexibility of space becoming more important, the addition of movable walls and sliding folding partitions is an ideal way of utilising existing space efficiently, effectively and economically.

Whether you want to sub-divide a classroom or office, host more than one function in a room simultaneously or create a number of rooms from one large floor space, we have a solution to suit all requirements and budgets.

Air – Individual Moveable Panel System

The Air range is an individual panel partition system offering an acoustic insulation rating of up to 59dB Rw. Ideally suited for high specification applications due to the sheer flexibility, numerous stacking arrangements available and its impressive acoustic qualities.

Infinity – Continuously Hinged System

The Infinity range is a continuously hinged system offering mid level acoustic performance. With multiple fixed rubber sweep seals, it can offer an acoustic insulation up to 45dB Rw. For added flexibility, or when there is no suitable structure to suspend from, the Infinity can be supplied as a bottom rolling option, running along a low profile floor track.

PARTITIONING

Manufactured to suit specific site conditions, maximise the space available and to minimise site installation time, our modular systems create cellular offices, meeting rooms and breakout areas within open plan spaces.

Using combinations of solid, glazed and part glazed panels and doors, either room dividing or wall backing StorageWall all come together to form a fully demountable and re-locatable structure.

LIBRARY

LIBRARY

LIBRARY

Our library units allow you to showcase your collection of books and literature.

It can have the same design features and characteristics of all the product range, enabling seamless integration. With superior weight loadings and high quality material, the library system will work in many environments.

GRAPHICS & SCULPTURED PANELS

SCULPTURED PANELS

Using a membrane press, we are able to produce decorative sculpted panels consisting of routed MDF with a pressure-formed laminate surface layer. The possibilities are endless, ranging from a woodgrain effect to high gloss or metallic surface. This coupled with CNC routed design, creates a stunning finish which adds real impact to your interior. You can have a bespoke textured design created or you can create your own design.

VINYL GRAPHICS

We are able to apply graphics to the StorageWall that will maximise your opportunities for corporate branding and also add a decorative design element to your office environment. The graphics have a protective laminate ensuring long term durability. We can also offer dry wipe or pinnable surface to the StorageWall.

CASE STUDY: SUMITOMO

SUMITOMO

Delivering a bespoke audio-visual alcove to facilitate smarter working.

The way businesses communicate and share information is changing. High quality video conferencing enables them to stay connected, helping save time and money, whilst increasing productivity.

Working in partnership with Artemis Interior Services on behalf of Sumitomo, we were asked to design and deliver a custom acoustic MediaWall to house a nine screen television for video conferencing, enabling smarter, more connected communications.

From the outset, the client had a very clear brief – to deliver a bespoke, seamless audio-visual alcove to exacting dimensions, measuring 3800mm wide x 2200mm high. This required a comprehensive survey and detailed planning.

This project presented the team at James Tobias with an interesting opportunity, as our standard alcoves do not exceed 2800mm wide. To counter this, we engineered a new custom solution.

In addition, working with the acoustic board generated its own challenges. Therefore, our manufacturing and installation teams needed to work with thorough precision.

Using our MediaWall solution, we designed and delivered an impressive fully-functional audio-visual alcove in acoustic light ferrera oak board that maximised capacity and minimised floor space requirements.

CASE STUDY

CASE STUDY: PRP ARCHITECTS

PRP ARCHITECTS

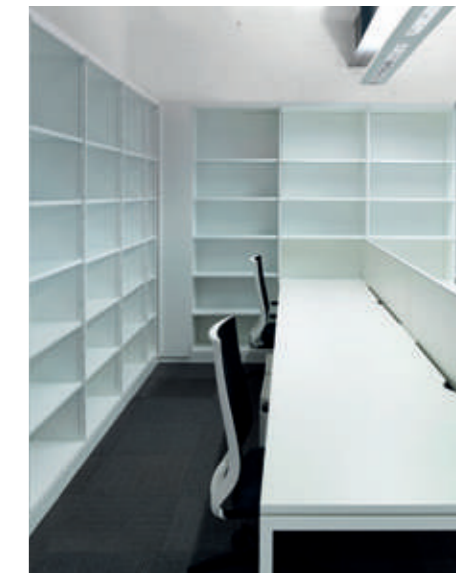

Creating a contemporary environment within a Victorian interior.

Architects PRP, based in a former Victorian factory in Thames Ditton, Surrey, enlisted the services of Crisp Design and James Tobias to refurbish their ground floor office space.

The brief was to create a modern, functional space that enhanced the building's industrial heritage but offered an optimum working environment and maximum storage capacity.

The James Tobias team brought together two individual solutions to create a bespoke solution – the full-height StorageWall, incorporating the SW11 open-fronted modules with SW20 sliding door modules and separate low level lockers, all finished in a white to create a clean, sharp, modern office feel.

James Tobias StorageWall is manufactured to suit specific site conditions, to maximise the space available and to minimise site installation time.

CASE STUDY: BARRY ISLAND PRIMARY SCHOOL

BARRY ISLAND PRIMARY SCHOOL

Helping bring a Victorian school building into the 21st century.

In 2014, Barry Island Primary School in South Wales invested in a considerable classroom refurbishment programme, to reinvigorate the school's learning environment for its staff and pupils.

With any refurbishment project, whether it's within a school, college or university, it is vital to consider how to create a flexible teaching environment that maximises valuable classroom space whilst ensuring essential storage requirements for everyday items are accommodated easily and effectively.

Working closely with bof (Bridgend Office Furniture), James Tobias overcame the challenges of increased ceiling heights and untrue walls to design and fit the

innovative EducationWall – a run of modular storage units to house all the key elements you'll find in a modern classroom – such as smart/interactive screens, Gratnell trays, charging points for tablets/laptops and lockers, to name a few.

The innovative storage unit helps staff and students reclaim all important classroom space, offering maximum flexibility and excellent storage capabilities.

The refurbishment programme represents a huge step forward for the school and we are proud of the result – a practical, flexible, ergonomic stylish storage solution that helps the school provide a tidy, safe and open learning environment where students can get on with the important task of learning.
