

Multinational Company

For our latest project with a leading multinational company, confidentiality is paramount, but our dedication to excellence remains evident in every detail.

BACKGROUND

For our latest project with a leading multinational company, confidentiality is paramount, but our dedication to excellence remains evident in every detail

ABOUT THE PROJECT

Embracing a captivating blend of blue and green hues, accented by the warmth of Halifax Oak, our design team curated a space that embodies sophistication and tranquility.

Stepping into the office, guests are greeted by a seamless fusion of style and comfort. Blue and grey carpet tiles pave the way through the corridors and meeting areas.

In the chill-out area, moss-colored carpets envelop the space, creating a serene oasis. This space invites occupants to unwind and recharge, while strategically placed plants infuse the atmosphere with the rejuvenating essence of biophilic design.

RESULTS

The result is an attractive, welcoming workspace combining spacious communal areas with biophilic design integrated throughout.
